Connect With Nature

an observational outdoor activity

* HOW TO _____

Can you and the children around you find something new on a walk outside? You might discover the name of a tree or a favourite flower. Look on the ground, are there any walnuts, conkers, leaves or bugs to spot? Talk about what you find, and you can even look it up together when you get home or back to the classroom.

Optional Discussion: What was the most interesting thing you found today? What made it stand out to you?
