Partner Intuition

a fun, non-verbal partner game

A playful game of focus, connection and non-verbal communication that builds body awareness and listening skills.

HOW TO PLAY

Stand opposite your partner, each pressing one index finger into either end of a paper straw to hold it up between you. Without letting the straw fall, one partner begins to lead, moving slowly in any direction, up, down, to the side, even down to the knees or walking around the room. The other partner follows, staying connected through the straw. Swap so both have a turn to lead.
